Message for Mr I Lee Safety section WAGN railway

from HMRI Nottingham office

Thank you for your call, I am finding that many more of my investigations are expecting instant response and as a n older hand i often find a bit of reflecting time is a good thing. However it was my judgement of what I witnessed on the 0803 departure between Royston and Cambridge that made me suggest that immediate controls were both needed and not being considered. hence the focusing of minds by a suggestion that enforcement action would be necessary to reduce the risk.

Please pass on my thanks to local business mangers Ms Palmer and Mr Willey for their help during my investigations.

My findings have been aired with them and I have no comment to make about the medium or long term aspirations and solutions.

**In case of difficulty, please contact sender**

**Number of Pages: 2**

*@ Willey agreed that a problem exist however  
PC wants short term solutions and long term solutions*
